Apache technology- the backbone of the internet

Trustix™ Web servers are built on the industry standard Apache Web server technology.

When your business deploys the Trustix™ Web Server, you are assured that your commercial website is running on the most secure, stable and popular webserver technology in the world.

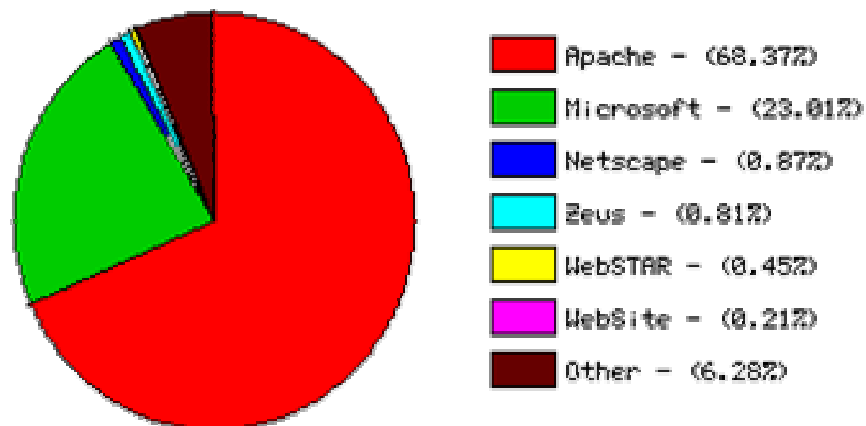

- As a collaborative, open source project, Apache technology has grown up with the web and has defined and reflected the potential and capacity of the internet.

Historical Market Share - Across All Domains

As the graphs suggest, the business community continues to show faith in Apache technology as the bedrock of its online ventures.

Market Share for November 2003 - Across All Domains

Once running, Apache 2.0 is a more capable, scalable performer than its competitors- whether you are running a single Trustix™ webserver or an enterprise wide online network. There is also complete OS compatibility – so you can run Apache on a Linux or Windows networks- and at a fraction of the cost of other web servers.

These features make Apache the most widely used and reliable Web serving technology on the market. Trustix Web Server incorporates this technology to provide the safest, most stable, capable and efficient solution available.

Trustix Web Servers- Ignite your online business.
