

Key Features – Protect your system and your privacy

- **Stealth Mode – Become invisible to Hackers** - This is a facility whereby the Trustix™ Personal Firewall does not acknowledge its existence on the Network, and thereby renders itself invisible. This means that it will not respond to requests made from outside, unless of course you know about it and allow these requests through.

- **Pop-Up Blocker** - Pop-ups are not only annoying, they tie up unnecessary bandwidth, downloading unnecessary advertisements you are not interested in, which again detract from your on-line task. More annoying is the fact that some Pop-up windows can launch other windows themselves, meaning you end up in an endless loop – Stop that ever happening with Pop-Up Blocker.

- **Spyware Killer** - Spyware is a general term for a program that surreptitiously monitors your actions. Whilst they are sometimes sinister, like a remote control program used by a hacker, software companies have been known to use Spyware to gather data about customers. The practice is generally frowned upon and infringes your personal rights. Using the most up-to date database available, Spyware killer ensures no-one spies on you.

- **Net-Lock – Immediate Protection** - Blocks all incoming and outgoing communication with a single click. Essential for immediate blocking of potential threats, but also allows the strongest level of control and is fully customizable to allow only your most trusted programs to make connections.

Offering Peace of Mind

Few security experts expect anything close to a let up in the 50 or more security related software vulnerabilities discovered every week and with new Internet threats appearing daily and as yet unknown payloads of Spyware and Pop-up ads which could also have Spyware embedded into them. You need a solution which meets your needs. Keeping Hackers out and keeping personal information in. You need Trustix™ Personal Firewall

System Requirements

Windows 98SE/Me/2000/XP,
233 MHz Pentium or higher,
20MB of available hard disk space,
Internet access and Microsoft® Internet Explorer 5.0.1 or Higher.
Minimum system RAM: 32MB with a 16bit Color Display adapter.

Trustix™
