Trustix™ Office Server

Trustix™ Office Server will empower any small enterprise with the network functionality that is essential to modern day business. Incorporating Web, Mail, Proxy and LAN servers, Office Server quickly endows your company with an efficient and solid network infrastructure- the backbone and springboard of any successful commercial endeavor. Setup is straightforward and quick- from the box to implementation in an unbeatable 25 minutes- and without the need for external technical support. In fact, you may *never* need IT help during the operational lifetime of your Trustix™ Office server. Why? Because the revolutionary and highly intuitive GUI interface that will be instantly familiar to all Windows users- it takes configuring your network environment out of the realm of the skilled administrator- and into the hands of the user. Trustix™ provide you with an enterprise level solution at small business prices.

Tailored to your needs

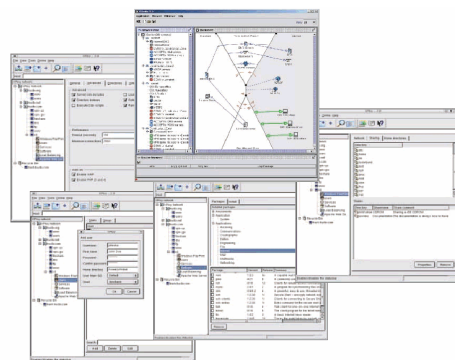

Trustix™ office server is specifically targeted to meet the needs of small businesses. Aimed at enterprises with between 10- 50 employees, your organization will benefit from the renowned Trustix™ Linux range, including Web, Mail, Proxy and Lan servers. If your organization has multiple offices then, by choosing the optional 2 zone Firewall, you can create a highly secure VPN connection – ensuring that all branches of your company able to communicate in a securely networked environment.

A proven track record

Office server is part of a family of products provided by Trustix™ Linux Solutions- the pre-eminent force in information security. Based on the Linux, the most reliable and robust OS for Enterprise Server Applications, Trustix™ products will reduce the total cost of ownership to your company over their operational lifetime. Each product is a Turnkey solution (use straight out of the box) and benefits from the platform independent Xploit utility – you can organize your servers and network services with a simple point and click interface- no more impenetrable command lines!! If you *do* encounter any problems then your company will enjoy unsurpassable support from our team of dedicated and tenacious technicians.

Linux?

Like all Trustix™ Linux products, Office Server is based on the extremely secure and scaleable Linux operating system, guaranteeing your networked environment is the most stable available. Don't worry about rumors that Linux is hard to install and manage! Office server ships with the Trustix™ management console- a wizard based application running on your Microsoft Windows or Linux desktops- you won't even notice Linux is running whilst you and your employees use Windows to share files, browse the web or send mail.

Why Trustix™ Office Server?

Small businesses face many problems the highly competitive arena of modern commerce. You need centralized storage for your documents, presentations and essential data, and a centralized service for logging in and out of your network. Internet access is a pivotal requirement of modern business so you would like a system to optimize bandwidth use via the use of a caching proxy.

Confidentiality is another paramount concern and, with ISPs mislaying vital mail on a daily basis, you need absolute control over your important mail communiqués.

If your enterprise has a web presence, and you don't want to let your customers down, then you require a server that is capable and robust enough to fulfill your needs.

Most importantly, this needs to be accomplished as quickly, effectively and inexpensively as possible- and without needing specialist IT knowledge to maintain.

The Solution

Reliable and effective networking capabilities were once the exclusive domain of global enterprises. Trustix™ Office Server will deliver this facility to your business in one cost effective and fully integrated package.

- Encourage teamwork amongst your employees with LAN server file sharing
- Build and maintain an online customer base with the Web server
- Maximize internet bandwidth usage via file caching with on the Proxy server
- Safeguard critical communications with the secure Mail Server
- Immunize your network from external attack with the optional two zone Firewall.
- Use the Firewall to establish a secure connection to branch offices

This functionality is combined with fast setup time (ready to go in 25 minutes) and the ease of network management afforded by the transparently intuitive Xploit GUI. With an outstanding worldwide support team to solve any hitches you may encounter, Trustix™ Small Office Server will generate immediate productivity gains to enable your small business to develop in the modern commercial environment.

Trustix™ Office Server- levels the playing field for small business.
