## Trustix™ Web Server

The Trustix™ Web Server provides a secure, stable and efficient platform for delivery of Web content.

The server is based on the world's most popular web server - the Apache Web Server engine. Over 65% of the world uses Apache. Building upon this, Trustix™ Web server offers a set of platform independent administration tools allowing secure remote configuration of multiple web servers from anywhere at anytime. – Empower your business with the peace of mind that a stable, secure web server means to your customers.

Because it is fully compatible with existing Web browsers and operating systems, the Trustix™ Web Server is an excellent choice for new or existing small-to medium-sized enterprises.

**Comodo Trustix™ Web Server is a fully featured solution which may optionally be combined with any of the following products:**

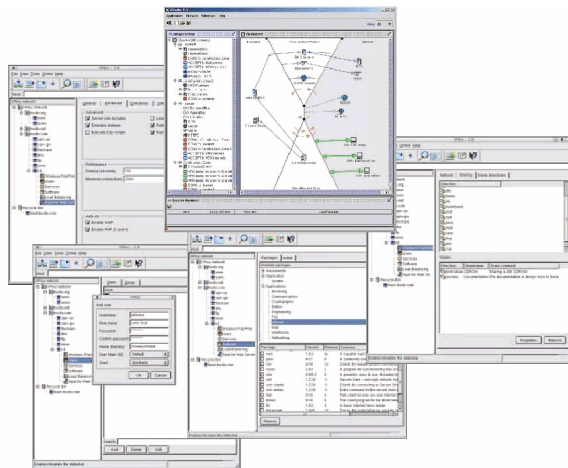

- Trustix™ Mail Server
- Trustix™ LAN Server
- Trustix™ Office Server
- Trustix™ Proxy Server
- Trustix™ Firewall Server

**Trustix™ Web Server is part of a range of Trustix™ Linux Solutions all of which provide:**

- Simple and intuitive centralized configuration and administration client for all products. It is not necessary to be a system level administrator.
- Highly reduced total cost of ownership (TCO) across the operational lifetime through the efficient GUI interface
- Turnkey solutions, including hardware and software
- Based on TSL (Trustix™ Secure Linux – The most secure, most reliable, most stable solution for Enterprise Server Applications)

## Trustix™ Web Server features

- Graphical management of the Web server engine from Microsoft® Windows and Linux desktops
- Compatible with all browsers
- Ready to run
- Based on Apache Web Server
- Compatible with existing networks, Microsoft, UNIX®, Linux and more
